Introduction of the content	<p>The Covid-19 global pandemic is the most extensive crisis that has afflicted humanity in a century. A formidable crisis for the entire world, and a daunting challenge, it poses a grave threat to human life and health. Making people's lives and health its first priority, the Chinese government has adopted extensive, stringent, and thorough containment measures, and has for now succeeded in cutting all channels for the transmission of the virus. The virus is currently wreaking havoc throughout the world. China grieves for those who have lost their lives and those who have sacrificed themselves in the fight, extends the greatest respect to those who are struggling to save lives, and offers true moral support to those who are</p>		

	<p>infected and receiving treatment. We firmly believe that as long as all countries unite and cooperate to mount a collective response, the international community will succeed in overcoming the pandemic, and embrace a brighter future.</p> <p>In order to share with you China’s experience in the fight against Covid-19 pandemic and in ensuring public health and security, IHECC will organize the Training Course on Diagnosis and Treatment of Covid-19 for Belt and Road countries from April 13<sup>th</sup> to April 22<sup>nd</sup>, 2021 in the form of live streaming, real-time communication, Q&amp;A and seminars. IHECC will employ management professionals and other experts as lecturers who not only master relevant theories, but also have considerable practical experience in the prevention and treatment of COVID-19 at the front line. The course includes different modules, which are designed to share China's experience of scientific prevention and control, and the adoption of targeted measures in a panoramic perspective that ranges from public health, medical care, scientific research (vaccine, traceability, biosafety) to government/social governance. Professionals who work at the frontline of the prevention and treatment of covid-19 will be invited to share their experience and knowledge in such areas as China’s public health system, prevention and control of covid-19, viral etiology and epidemiology, nucleic acid testing, imaging diagnosis and identification, treatment for the affected and critically ill patients, treatment with Chinese medicine, infection control of medical services, self-prevention of medical staff, vaccine development and inoculation.</p>		
Venue	Beijing, China	Trips in other cities	/
